Post Shoe and Footing Specs

Concrete Footing size: 300 square by 600 deep

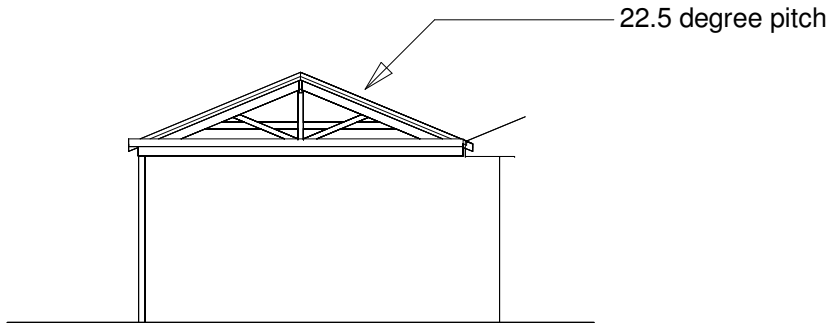

Post Shoe type: Tornado

Plans to be read in conjunction with Softwoods Gable roof Engineering (SGRE0201) issued 21/2/01, prepared by Core Engineering and certified by RT Taylor and Associates Pty Ltd. All timber to be CCA or LOSP treated Radiata Pine. Structural members are treated to a retention level of H3 (posts H4) and kiln dried after treatment in accordance with AS1602. For details of timber sizing and connections relating to pitched roof structures refer to the relevant Softwoods standard engineering and details. Flat and skillion roof structures have been designed and are built in accordance with AS1684.2-1999. Proprietary brackets and fasteners are to be used in accordance with manufacturers engineering and specification. Roof sheets, gutters and flashings are to be installed in accordance with their respective manufacturers recommendations. Plans, engineering and specifications are copyright of Softwoods Timberyards Pty Ltd A.C.N 076 530 848 and must not be copied, reproduced or distributed in any format without written consent by a director of the company.

We have pleasure in quoting for supply of materials for your outdoor project. We pride ourselves in the level of customer service, advice and ideas striving to make your outdoor project a success. Our aim is to be competitive at all times. In the unlikely event that you get a lower quote for the same design we would welcome the opportunity to beat that price and still provide you with the service that you deserve. We want to make it very clear that we want your business, so please review your quote carefully and then to order or ask questions please give us a call.
